

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,  
AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS  
TO THE STATEMENT OF ACTIVITIES  
FOR THE YEAR ENDED DECEMBER 31, 2006  
(IN THOUSANDS)

Amounts reported for governmental activities in the statement of activities are different because:

Net change in fund balances – total governmental funds	\$ 3,449
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlays exceeded depreciation in the current period.	55,333
The net effect of various miscellaneous transactions involving capital assets (e.g., sales, trade-ins, and donations) is to increase net assets.	41,756
Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the governmental funds.	445
The issuance of long-term debt provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction has any effect on net assets. Also, governmental funds report the effect of issuance costs, premiums, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities. This amount is the net effect of these differences in the treatment of long-term debt and related items.	101,406
Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds.	(901)
The net revenues and expenses of certain activities of internal service funds are reported with governmental activities.	8,077
Change in net assets of governmental activities	<u>\$ 209,565</u>

The notes to the financial statements are an integral part of this statement.
